Research Interests

My research focuses on developing partial differential equations (PDE)-based algorithms to solve high-dimensional machine learning problems and analyze the theoretical properties of the algorithms.

Machine learning, generative modeling, contrastive learning, optimal transport, gradient flows, mean field games.

Academic Positions

University of Minnesota, Twin Cities

Minneapolis, MN

IMA-NIST Postdoctoral Fellow

Aug 2022 - Present

- A joint IMA-NIST Postdoctoral Fellowship in Analysis of Machine Learning at the Institute for Mathematics and its Applications (IMA) in the College of Science and Engineering at the University of Minnesota (UMN).
- Working on machine learning research with Prof. Jeff Calder, Prof. Gilad Lerman, and Prof. Li Wang.

University of California, Los Angeles

Los Angeles, CA

Assistant Adjunct Professor

Jun 2022 - Aug 2022

- Taught introductory programming course in C++ (PIC 10A) as a main instructor.

Education

University of California, Los Angeles

Los Angeles, CA

Ph.D. in Mathematics

Sep 2017 - Jun 2022

- **Advisor:** Professor Stanley Osher.
- **Thesis:** Algorithms For Optimal Transport And Their Applications To PDEs.

George Mason University

Fairfax, Virginia

B.S. in Mathematics

May 2015

- Concentration in Applied Mathematics and Mathematical Statistics.
- GPA: 3.84/4.0 *magna cum laude*, Phi Beta Kappa.

Honors and Awards

2022 Rising Star in Data Science from the University of Chicago. [PROFILE LINK.](#)

2021 UCLA Dissertation Year Fellowship (\$20,000)

2014 2014 Outstanding Presentation Award at the Joint Mathematical Meetings, Baltimore, MD.

Teaching Experience

University of Minnesota

Minneapolis, MN

Instructor

Aug 2022 – Present

Fall 2024 **Math 2243**: Linear Algebra and Differential Equations

Summer 2024 **Summer School**: Machine Learning Summer Camp for high school students

Spring 2024 **Math 2243**: Linear Algebra and Differential Equations

Summer 2023 **Summer School**: Machine Learning Summer Camp for high school students

Summer 2023 **Summer School**: Random Structures in Optimizations and Related Applications

Spring 2023 **Math 2243**: Linear Algebra and Differential Equations

University of Minnesota

Minneapolis, MN

Mentor from Directed Reading Program (DRP)

Aug 2023 - May 2024

- Mentoring undergraduate students for the quarter-long independent study project in math.
- Topics: survey of optimization methods and their applications in neural networks.

University of California, Los Angeles

Los Angeles, CA

Teaching Assistant

Aug 2017 – Jun 2021

- PIC 10ABC: Intro, intermediate, advanced C++ programming.
- PIC 16: Python with Applications - Python modules such as PyQt, SciPy, Pandas, and NLTK.
- Math 164: Fundamentals of optimization. Linear / nonlinear programming.
- Math 151B: Applied numerical methods with analysis of algorithms and computer implementations.

University of California, Los Angeles

Los Angeles, CA

Mentor from Directed Reading Program (DRP)

Jan 2021 - Mar 2022

- Mentoring undergraduate students for the quarter-long independent study project in math.
- Topics: unsupervised learning of image segmentation, generative adversarial networks, applications of mean field games in finance.

Service and Outreach

2024 Ambassador for the University of Minnesota's Data Science Initiative (DSI), **UMN DSI**

2024 Co-organizer of the minisymposium 'Theory and Applications of Optimal Transport in Machine Learning' with Jeff Calder, **SIAM Annual Meeting 2024**

Work Experience

University of California, Los Angeles

Los Angeles, CA

Research Assistant

Aug 2017 – Aug 2022

- Developed efficient algorithms using PDEs and optimal transport to solve challenging problems, including Wasserstein gradient flows, Navier-Stokes equations, and epidemic models. (PyTorch, C++)

George Mason University

Research Assistant

Fairfax, VA

May 2017 – May 2018

- Developed deep learning methods using SVD and diffusion map for classification tasks. (Tensorflow)

Cheiron, Inc

Actuary

Washington D.C.

Feb 2015 - Sep 2016

- Evaluated the likelihood of undesirable events using actuarial pricing and projection models.
- Worked on actuarial valuation reports for public, single-employer, and multi-employer plans.

Presentations, Talks

- 2024 UMTC-UMD Postdoc Seminar Program, *Understanding Contrastive Learning from Variational and Neural Network Optimization Perspectives*, **University of Minnesota, Duluth**
- (Poster) SIAM Conference on Mathematics of Data Science (MDS24), *Understanding Contrastive Learning from Variational and Neural Network Optimization Perspectives*, **Atlanta Georgia**
- 2024 SIAM Conference on Mathematics of Data Science (MDS24), *Understanding Contrastive Learning from Variational and Neural Network Optimization Perspectives*, **Atlanta Georgia**
- 2024 SIAM Annual Meeting (SIAM AN24), *Geometry-preserving encoder and decoder on latent diffusion models*, **Spokane, Washington**
- 2024 Computational and Applied Math (CAM) Seminar, *Monotone Generative Modeling via a Gromov-Monge Embedding.*, **Georgia Tech**
- 2024 Applied Math Seminar, *Monotone Generative Modeling via a Gromov-Monge Embedding.*, **UC Santa Barbara**
- 2023 Workshop on Models and Algorithms for Path Planning (MAPP), *Monotone Generative Modeling via a Gromov-Monge Embedding.*, **UT Austin**
- 2023 Analysis and Probability Seminar, *Monotone discretizations of levelset convex geometric PDEs.*, **Iowa State University**
- 2023 A Monthly Seminar at The Mokaplan Research, Mokameeting, *Monotone Generative Modeling via a Gromov-Monge Embedding.*, **Inria Paris**
- 2023 Kernel Club, *Monotone Generative Modeling via a Gromov-Monge Embedding.*, **Colorado School of Mines**
- 2023 ACMD Seminar, *Monotone Generative Modeling via a Gromov-Monge Embedding.*, **National Institute of Standards and Technology (NIST)**
- 2023 Workshop on kinetic and optimal transport, *Deep JKO for general gradient flows.*, **University of Minnesota**
- 2023 2023 Algorithms for Threat Detection PI Workshop (Poster session), *Monotone generative modeling via Gromov-Monge Embedding.*, **Washington D.C.**
- 2023 The Level Set Collective II, *Monotone discretizations of levelset convex geometric PDEs.*, **UCLA**
- 2023 SIAM Conference on Computational Science and Engineering, *Monotone discretizations of levelset convex geometric PDEs.*, **CSE23**
- 2022 IMA Data Science Seminar, *The back-forth method for Wasserstein gradient flows.*, **University of Minnesota**

- 2021 Optimal transport and Mean field games Seminar, *Mean field control problems for vaccine distribution.*, **University of South Carolina**
- 2021 Current Literature in Applied Mathematics Seminar, *The back-forth method for Wasserstein gradient flows.*, **UCLA**
- 2020 Optimal transport and Mean field games Seminar, *The back-forth method for Wasserstein gradient flows.*, **University of South Carolina**
- 2020 The Level Set Collective, *Numerical Methods and Applications of Optimal Transport.*, **UCLA**
- 2019 Optimal transport and Mean field games Seminar, *Tropical Wasserstein Distances in Phylogenetic Tree Space.*, **UCLA**
- 2019 Optimal transport and Mean field games Seminar, *Energy-efficient Velocity Control for Massive Rotary-Wing UAVs: A Mean Field Game Approach*, **UCLA**

Skills and Hobbies

Programming C/C++, Python, Matlab
Language English, Korean
Hobbies Movies and video games
